Dear Dr. McAllister:

Earlier this year, I sent a preliminary inquiry to you about the possibility of making a research application to The Council. Although The Council declined to request a follow-up application at that time, a colleague of mine, Dr. Reuben Lotan, has suggested that I make a second try.

Would you be so kind to send me a description of The Council's objectives and current deadlines for submission of grants at your earliest convenience?

Sincerely,

Scott M. Thacher
